**Subject:** MCFA ESA Workshop Meeting, Wednesday September 18, 2019 -- 3:00 PM  
**Attachments:** Meeting Attendance List.xlsx; CLA\_Comments\_DraftRevisedMethod\_EPA-HQ-OPP-2019-0185.pdf; Workshop Proposal.docx

To All:

I have attached the Invited participants list for the meeting this Wednesday afternoon of the MCFA ESA Workshop Committee. This meeting list will be provided to security in the lobby to facilitate access to the meeting room. I know that several of you will not be able to be there in person. Please use the following information for access to the meeting, Call In Number [Ex. 6 PP - conference code/call in number] I will open the conference line shortly before the scheduled meeting start time. Please let me know if you intend to participate via conference call so any additional information can be forwarded to you prior to the meeting.

I have attached the discussion draft for the proposed workshop (this was sent earlier), also attached are CLA Comments to EPA's proposed revisions to the Risk Assessment process that includes a case study done by Stone Environmental. These will serve to guide the discussions on grower developed data for inclusion in the process.

I look forward to the discussions on Wednesday.

Thanks for your interest and participation.

Dan Botts
